Profile

Motivated software engineer with experience in full-stack development (C++, C#, Node.js, React.). Skilled in MySQL, RESTful APIs, and Agile. Strong leadership skills, fast learner, and team player. Currently expanding expertise in automation and software testing.

Work Experience

ERP System Development – Freelance (2025)

- Led full-stack development of a custom ERP system using SQL, Node.js, and React.
- Built user, task, client, and reporting modules.
- Collaborated with clients and UX/UI designers to deliver a responsive and intuitive interface.

Volunteer Management System – Academic Project (2024–2025)

- Co-developed a hospital volunteer tracking system in C#.
 - Implemented scheduling, hour tracking, and reporting features.
 - Emphasized maintainable code and real-world usability.
-

Education

Reichman University – Tech School | 2025 – Present

Agile methodology, Software Testing and Automation (Cypress with TypeScript, Selenium with Java), and Real-Time/Embedded Systems development in C (Microcontrollers, I2C/SPI protocols, Race Conditions prevention). Advanced modules include

Lev Academic Center – Jerusalem | 2023 – 2025

Certificate in Computer Science

Object-Oriented Programming, Algorithms, Software Engineering, Databases, Full-Stack Development

Technical Skills

- **Programming:** C++, C#, Java, JavaScript, Python, HTML, CSS
 - **Frameworks & Tools:** React.js, Node.js, Express, Git, GitHub, Postman, Selenium
 - **Databases:** MySQL
 - **Practices:** RESTful APIs, Object-Oriented Design, Agile, Software Testing & Automation
 - **Soft Skills:** Problem-solving, Independent learning, Teamwork, Adaptability
-
